EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bruce Troxell on June 30, 2005.

The application has been amended as follows:

In the Specification:

The ABSTRACT has been replaced by the following paragraph on a separate page:

---ABSTRACT

The present invention discloses an improved air filter structure, comprising a container, a housing covering the container, a motor, a fan, and a stirring rod disposed at the bottom of the fan. A plant liquid or an aromatic liquid is placed in the container, and the gas outside the housing circulates continuously in and out of the container by the fan, such that the molecules of the liquid in the container can be released quickly to fill the space of a room with fragrance. When someone is approaching the device, a sensor will turn on a control switch and start the motor. The air entering the container will be in touch with the surface of the liquid, so that the dust originally mixed in the air will be attached on the surface of the liquid and sunk to the bottom of the container by gravitation.---

Art Unit: 1724

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose a device having the plurality of sensors coupled to a control switch for starting the motor, combined with a motor, fan, and stirring rod dipped into a plant or aromatic liquid, wherein both dust is being captured and aromatic droplets are dispersed into the air flowing into and out of the container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose air fresheners and filter systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank M. Lawrence whose telephone number is 571-272-1161. The examiner can normally be reached on Mon-Thurs 7:30-6:00.
